

1. Choose which leg to mount shelf onto.
2. Place shelf upside down on a clean surface (according to your preferred configuration) and place mounting bracket on top as per illustration. Make sure it is centered.
3. Drive 1/2 inch wood screws **ONLY** directly into wood using a power driver. Do not overdrive.
4. Mount bioshelf assembly onto desk leg at any point and tighten screw until snug. Place at bottom of leg for heavier weights. Center weight on shelf close to desk leg.
